

CENTRIFUGAL AIR BLOWERS

CONTINENTAL manufactures a wide range of blowers

Type	: Centrifugal
Volume range	: 4 to 3000 metre cube/minute
Stage	: Single/twin/multi-stage
Motor horse power	: 0.5 H.P. to 150 H.P.
Type of drive	: Direct driven/V-belt driven/coupling driven

CONTINENTAL blowers incorporate the best concepts in centrifugal machinery designs to give high efficiency performance. These are combined with the latest manufacturing technologies to minimize cost without sacrificing the sturdy and easy maintenance features for which **CONTINENTAL** blowers have acquired a strong reputation over the years.

CONTINENTAL blowers are made with steel plate fabricated construction with fabricated steel impellers. Impellers are dynamically and statically balanced in our most advanced high accuracy digital balancing machine for minimum vibration. Blowers are also manufactured with stainless steel, aluminium and FRP-lined for special applications. Our blowers are available in direct, V-belt or coupling driven options.
